

*You may have heard of “One Million Acts of Green”...In April 2010, we will be launching an exciting, industry-first environmental awareness campaign called **3600 Acts of Green**.*

Modelled after the successful “*One Million Acts of Green*,” this campaign will engage our associates, clients and customers across the country to share their simple daily actions to reduce environmental impacts.

A new email address will be created:
3600actsofgreen@compass-canada.com.

Associates, clients and customers will have the opportunity to email their particular “act of green,” along with their unit location, city, and province. The responses will be posted on Navigator and on the external website - the goal is to post **3600** “acts of green.”

Examples of “acts of green:”

- Picking up litter
- Carpooling
- Using reusable containers

We can’t wait to hear about your “act of green!” Look for more details in the coming months.
